

Key words

seasons	There are 4 seasons each year: autumn, winter, spring and summer
spring	In spring the weather gets warmer, plants begin to grow and the days stay lighter for longer.
summer	In summer the weather gets hotter. There are lots of animals and plants out. The days stay light for the most amount of time.
weather	This includes temperature, how windy it is and how much rainfall there is.
daylight	When it is light outside. The amount of daylight changes with the seasons.

Spring is a time of growth after winter is over. Many plants grow and new baby animals are born.

Seasonal Change: Spring to Summer

In summer, the days get hotter and stay light for longer. Many people use this time to go out, visit the seaside or go on holiday.

spring March April May	summer June July August
autumn September October November	winter December January February
