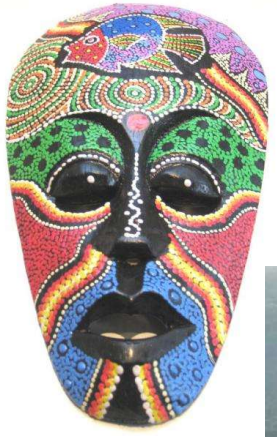
OAK ON SAFARI

Africa	A continent made of lots of different countries.
climate	The type of weather in different places.
continent	A big space of land containing lots of different countries. There are 7 on Earth.
country	An area smaller than a continent where lots of people live.
desert	A large, sandy area of land.
equator	The hottest part of the world, the part of the Earth closest to the sun. The equator runs through Africa.
ocean	A huge area of water, where all the seas meet. There are 5 oceans on Earth.
Nile	The longest river in Africa and the world.
rainforest	A large forest with lots of rain, usually in hot countries.
Sahara	The largest desert in Africa.
savannah grassland	A large area of grass where animals like to live.

Some **grassland** animals you might see on safari.



A view of the River Nile from above. The Nile is the longest river in the world.

There are some fantastic African folk stories that have been retold through the Tinga Tinga Tales. We will be learning some of them in English.
